

THE GAP

The icons global libraries never drew.

Search any major icon set for "danfo". You get a bus.

THE PROBLEM

Generic shapes carry a culture badly.

A yellow minibus is not a bus. A suya skewer is not a kebab.

THE WORK

30 drawings on one 24-pixel grid.

One stroke logic, one live area, one canvas. Validated in CI.

Legible at 16 pixels or it does not ship.

Two drawings were withdrawn from this release for failing that.

One weight, and we say so.

Thin, bold and fill are specified and undrawn. A weight is a drawing, not a stroke-width.

THE INVITATION

Nigeria first. Africa expanding.

Open source, MIT. Corrections and local names welcome.
